# The Secret To Our Suction

At the HEART of every Valet power unit is our unique range of highly efficient, long life motors which deliver consistent vacuum power to every corner of your home.

Valet's range of ducted vacuum systems compliment the design and construction of today's contemporary homes.

Each Valet Ducted System is specifically chosen to suit both the size and style of your home and to blend with your floor coverings.

## 1. Inlet Diverter Stem

- Valet's unique design starts the process of cleaning the air inside your Ducted Vacuum System
- Fast change filter bag collar.

## 2. Max Flo Filtration

- Ensures HEPA Type filtering of the removed household dust & dirt
- Maximises system airflow
- Provides optimum power

## 3. The Heart of the Valet System

- Delivers quiet operation with soft-start technology
- Saves energy and reduces wear and tear
- Produces up to five times the power of a portable vacuum

## 4. Suction Motor: Built to Last

- Highly efficient tangential by-pass technology
- Soft-start "start up" for long life operation
- Minimum power used / maximum suction created

## 5. Air Discharge Core

- Cleans and filters household air
- Exhaust empties into a muffler system

# ***Powerful. Reliable. Built to Last***

***Valet's highly efficient, soft-start vari-speed motors use the latest technology to deliver consistently powerful cleaning performance in every corner of your home and provide years of dependable service. Fully guaranteed, Valet's Ducted Vacuum systems have been refined through many years of research and development. The power unit canisters are engineered from durable, corrosion-resistant steel for a long, trouble-free life.***

## ***Big On Power...***

Valet Ducted Systems are more powerful than standard vacuums and the power unit can be located in a variety of places around your home outside of your living area.

A Valet motor offers from 2HP to a huge 4HP of power and is also ultra quiet. You can use your ducted vacuum system in rooms where your family is watching TV or even sleeping without disturbing them! Ask your Valet Dealer about how the variable speed control system gives you a superior clean to every area in your home.

## ***Big On Reach***

The hidden motor connects to several inlets discreetly positioned throughout your home. With the lightweight 9 meter E Flex hose provided, an average home needs about 3 inlets to provide 100% coverage of all floors, curtains and corners. Your Local Valet Dealer is an expert and can design the optimum system for your living space.

Just think, no more pulling that tired old vacuum cleaner around, no more recycled vacuumed air pouring out and back inside your home and no more wondering where the suction power has gone. Call today and let a Valet Ducted system change the way you clean forever!

## ***Big On Cleaning...***

Valets unique Tornado Power Head Cleaning System gets right down to the job of lifting damaging dirt from your carpets and rugs.

Everyday dirt and grit penetrate deep into the carpet pile and as human and pet traffic walk on top they twist and shift those particles, cutting the pile close to the web of the carpet mat. These become the high wear and tear areas.

Regular cleaning with Valet's Tornado Powerhead Cleaning System, vibrates the damaging dirt loose, lifts the dirt out and the carpet brush rejuvenates your carpet pile all under the most powerful vacuum suction available today.

The Valet Ducted Vacuum System offers the homeowner the widest range of cleaning tools. Every home has a unique feel and style with its design and décor and Valet can match those choices with a comprehensive range of vacuum hoses, wands, floor and wall cleaning tools and applicators and accessories.

The Valet Sensitive Choice partner cleaning kit expands traditional vacuum cleaning with new moist mop cleaning for the reduction of air-born dust and allergens.

## ***The Valet Guarantee***

The Valet range of Ducted Vacuum Systems has a reputation of performance second to none and is the industry leader in quality and durability. The Valet reputation of performance over many years, makes your decision easy.

The Valet Premium Range of Central Vacuum Systems come with an industry leading 6 year manufacturers motor warranty and a lifetime guarantee on your canister. The systems are designed, manufactured and installed to become a valuable asset for your home.

# A Cleaner Home & Cleaner Air

Ask your Valet dealer about the amazing Vac Pan for your kitchen or laundry areas.

## **Sensitive Choice™**

The Sensitive Choice™ program is operated by the National Asthma Council Australia (NAC) and encourages the marketing of products that may benefit people with asthma and allergy problems.

With over 12% of the population suffering from asthma and 40% of the population from allergies, the Sensitive Choice™ program has been launched to help Australians make better lifestyle choices that may help manage asthma and allergies more effectively.

The Sensitive Choice™ program helps people identify companies that are committed to reducing asthma and allergy triggers.

Sensitive Choice™ butterfly trademark symbol indicates that an individual's exposure may be reduced but this does not mean that an individual's asthma or allergy symptoms will necessarily diminish. Products should be used only for their intended purpose and strictly in accordance with the manufacturer's instructions at all times. The licensing fees from manufacturers enable the NAC to fund asthma education and research.

## **Your Valet Dealer Network**

Throughout Australia and New Zealand there is a factory trained and authorized Valet Dealer close by. If you are planning a new home or rebuilding your existing home then a Central Ducted vacuum makes cleaning sense. Each Valet Dealer is a proud Sensitive Choice Partner of the National Asthma Council's program to reduce asthma and allergy triggers.

Your existing or new home may have a variety of floor finishes, carpet, rugs, tiles and timber. Some surfaces may have high use or low usage and may require frequent or careful attention. Your Valet Dealer can advise you on each of these so that you can rest assured that your new Valet central vacuum system will cover your every cleaning need.

# Why Ducted?

## Relax and Breathe Easy

*With Valet, dust and allergies are down and out.*

It is commonly known that domestic dust and other microscopic allergens can provoke asthma attacks and allergies. So it makes sense to choose a ducted vacuum cleaning system with the vacuum motor located outside the living areas. Valet has recently become a Sensitive Choice Partner supporting Asthma care and has been selected by the National Asthma Council of Australia and the Asthma and Respiratory Foundation of New Zealand ( See [www.sensitivechoice.com.au](http://www.sensitivechoice.com.au)) as the only Ducted Vacuum system to meet their product testing approvals process.

The unique features of Valets deep down powerhead cleaning, its MaxFlo dust and dirt capture system and a network of ducted pipes, leave your house perfectly clean and free of dust and allergens. Valet's unique MaxFlo filter technology also protects the air outside.
